Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18 and 33-40, drawn to a composition comprising a copolymer having acrylate functional groups and acid functional groups, a color filter and liquid crystal display panel.

Group II, claim(s) 1, 2 and 19-32, drawn to a composition comprising a copolymer having imide functional groups and acid functional groups and a liquid crystal panel.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The copolymer in the composition of Group I is required to contain acrylate functional groups as the ethylenically unsaturated photocurable group. The copolymer in the composition of Group II is required to contain imide functional groups as the ethylenically unsaturated photocurable group. That the acrylate group and the imide group in the copolymers are ethylenically unsaturated groups or a photocurable groups does not provide a special technical feature or a single inventive concept because compositions comprising copolymers having ethylenically unsaturated groups, ethylenically unsaturated monomers and photoinitiators are known in the art. The products obtained by photocuring the different copolymers would be expected to have different properties and provide significantly different products, i. e. color filters and liquid crystal displays. See JP 10-221848 or JP 2002-293837 or JP 2002-341531 or JP 2002-105456, each cited by applicant.

A telephone call was made to Richard J Strelt on 4-15-2008 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr Strelt requested a written restriction requirement be mailed to applicant.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1796

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
